Question: 3

Which expression is a valid Webex Teams webhook filter?

A. personEmail=person@example.com+roomId=abc123
B. personEmail=person@example.com-roomId=abc123
C. personEmail=person@example.com&roomId=abc123
D. personEmail=person@example.com,roomId=abc123

Answer: C

Explanation:
You can also use more than one filter in a webhook. To use multiple filters, combine them with the "&" symbol. For example, to create a webhook that only sends notifications when a specific person performs an action in a specific room, such as sending a message or creating a membership, combine the personEmail and roomId filters.
